

BROSCO / Larson Storm Doors – Partnership Announced

BROSCO is pleased to announce that it has entered into a distribution agreement with Larson Manufacturing Company of Brookings, SD and will begin distributing their products on April 13th, 2011.

For over 50 years, Larson has brought innovations, value and quality to the storm door business. They build storm doors and windows that are durable, energy efficient, stylish and a great value. **Made in the USA** - Larson Manufacturing is the largest manufacturer of storm doors and storm windows in the United States and have manufacturing plants in Brookings, SD; Lake Mills, IA; Clear Lake, IA; and Mocksville, NC.

Larson has introduced many patented product features through-out their history. The *ScreenAway* retractable screen system, magnetic weather-stripping, and *Dura-Tech* Door construction are unique items that BROSCO will have in stock and ready for your immediate needs. The *EasyHang* – “No cutting required” installation method simplifies the install process and dramatically reduces mistakes in the field. This coupled with industry leading customer service and product warranties provide you with a large selection of quality storm door products that are built to last.

BROSCO will be stocking a complete offering of Storm Doors including; Full View, Retractable Screen and Ventilating door style and a large assortment of doors including 7 color options and 6 different handle finishes.

Larson also offers storm, ventilation and security products including storm windows, Interior storm window panels, patio storm doors, steel security doors and retractable screens for doors and windows. BROSCO will be providing these products as special orders for our customers.
