

## EASALIGN SYSTEM

The industry's revolutionary method for handrail joinery is exclusive to Crown Heritage. EasAlign's patented system matches Crown Heritage handrail profiles perfectly. The system comes complete with a kit to get you started and refills are available in 30 and 10 piece kits.

### SUPERIOR JOINTS AND FINISHES WITH EASE

No more fumbling with rail bolts, wrenches, and plugs because EasAlign uses a fastening system featuring Invis<sup>®</sup> Active and Passive elements. These elements are installed inside the wood and magnetically fastened using an Actuator tool. This results in strong, evenly aligned connections that require less sanding and eliminate unsightly plugs. EasAlign handrail installations can be performed off-site, unassembled, then reassembled on-site, which saves valuable installation time.

**EasAlign**<sup>™</sup>
