# Traditional Railing System

Set newel posts to accommodate pre-drilled rail length. Center pre-drilled rail between newel posts and trim equal amounts from each end of top and bottom rails.

1

Slide Rail Hanger Bracket over the end of the rail and attach with screws through end of rail. *(Hint: Opening of bracket must always be up)*

2

With a high-quality polyurethane construction adhesive, fill all the holes half way. Insert balusters into pre-drilled holes in rail. This will bond the wood to the balusters.

3

Apply pre-drilled top rail. Attach Cap rail. Fasten railing section to posts with hanger brackets.

4

*(Note: Optional stair connectors change the baluster to rail connection to a 35-degree exterior stair angle. Simple! Check with the local building department as local building codes and by-laws may apply.)*

Posts also available in Western Red Premium Cedar or Treated. (posts not included in kit)

Kit box

## Vista Traditional Railing System

Everything you need between the posts!

- ✔ 2 profiled & precision factory pre-drilled rails
- ✔ 1 profiled cap rail
- ✔ 15 powder-coated balusters (round/straight)
- ✔ 2 pair railing hanger brackets with fasteners

Available in Western Red Premium Cedar and Treated.
