Features and Benefits

- Framing is built from thick vinyl extrusions which are optimized for superior weather resistance, durability and color retention.
- Frame and panel corners are fusion welded, increasing strength and maximizing weatherproof performance.
- Aluminum reinforcement in both interlock stiles for added strength and beauty.
- Smooth operation on four adjustable steel ball bearing rollers on a stainless steel track.
- Extruded aluminum threshold cover to protect sill and prevent debris build-up.
- Panel anti-lift blocks for additional security.
- Heavy-duty extruded screen.
- Reversible handing in the field prior to installation.
- Air spaces in chambers provide superior energy efficiency.
- Tighter seals to eliminate drafts and reduce water infiltration, less call backs and improved energy efficiency.
- Cleaner sight lines.
- Easy installation and replacement design for remodeling or new construction projects.

Door Handle Finishes
